

RUBBER WALL GUARD

DESCRIPTION:

The wall protector is made of durable rubber. This wall guard is typically installed on the walls of garages, warehouses, covered parking lots, and other areas. With its bright yellow reflector and deep black color, the wall protector attracts drivers' attention even in low-light areas, which is common in underground parking garages. The wall protector has a long life regardless of weather conditions, making it suitable for both indoor and outdoor car parks. It is also very simple to attach to walls using screws and plugs.
